SUMMARY

Aspiring Full-Stack Developer with hands-on experience in building modern web applications using Java, React.js, and Spring Boot. Proficient in both front-end and back-end development, with practical knowledge of REST APIs, authentication (Google Auth0), and MySQL database design. Comfortable with deployment using Docker and Vercel, and familiar with CI/CD concepts.

Strong foundation in core computer science principles including Data Structures, Algorithms, OOP, and Operating Systems. Passionate about developing scalable, user-focused software solutions

EDUCATION

Pandit Deendayal Energy University, Raysan Gandhinagar

2022 – 2026

Bachelor of Technology

Computer Science and Engineering

Cumulative GPA: **7.77/10**

TECHNICAL SKILLS

Programming Languages: Java, React.js, C, HTML, CSS

Databases: MySQL

Backend: Spring Boot and Google Auth0

Developer Tools: Git, GitHub, Visual Studio Code, Postman, IntelliJ Idea

Deployment Tools: Vercel, Docker, Familiar with CI/CD concepts (GitHub Actions)

Cloud Computing: Theoretical knowledge of virtualization, cloud models (IaaS, PaaS, SaaS), scalability Principles

Computer Fundamentals: Data Structure and Algorithm, DBMS, OOPs, Operating System

PROJECTS

[Fake News Detection System](#)

Python, Pandas, TensorFlow/Keras, Flask and React.js

- Built a ML model to classify news articles as real or fake using NLP techniques.
- Achieved 88% accuracy using TF-IDF vectorization.

[Banking REST API](#)

Java, Spring Boot

- Developed a Restful API for a banking system enabling user to deposit, withdraw, delete accounts By Id, retrieve accounts details, and add new accounts

[Sangeet: Music App](#)

React.js, Google Auth0

- Developed a music streaming app similar to Spotify by integrating the Spotify API.
- Implemented email-based login using Google Auth0.
